

# Report:

## *External and Internal Scholarship Graduates*

# *Graduate Survey 2015:*

## *External and Internal Scholarship Graduates*

---

This report provides the Graduate Survey 2015 findings based on the type of scholarship (external / internal). The report is divided into two chapters. The first chapter compared the work status of internal scholarship graduates with external scholarship graduates specified by gender, working sector, acquired skills required in the labor market. The second chapter compares the survey findings related to those who graduated in 2010/2009 and those who graduated in 2013/2012. Some of the significant findings presented in this report are:

- External scholarship graduates are more employed than internal scholarship graduates are by 9.5 points.
- External scholarship graduates believed that their qualifications and specialties commensurate with their work requirements more than did the internal scholarship graduates.
- The percentage of both External and internal scholarship graduates of the academic year 2010/2009 hired is more than the graduates of the academic year 2013/2012 are.
- Employability of males' graduates is higher than that of female graduates regardless if they were on external or internal scholarships.
- The external scholarship graduates got higher starting salaries than did the internal scholarship graduates.
- Trained graduates are more likely to get jobs than those who have not undergone training for both internal and external graduates.
- Nine to Seven Months is the average period taking to get the first job for both internal and external scholarship graduate.
- The difference between skills and knowledge acquired by external scholarship students in study and required in workplace is less than that of internal scholarship students.
- Both internal and external scholarship graduates believed that is "Practical Training "was the worst service offered by higher education institutions while "availability of references and learning resources" was the best service.
